OUTSTANDING FEATURES ABOUND. A COMPELLING MATERIAL.

Simple processing

Although HIMACS is almost as robust as stone, it can be worked in the same way as wood. Using conventional carpenters’ tools, this solid surface material can be sawn, routed or drilled. Thanks to the new Thermalcure-tech- nology the surface of HIMACS performs better than the standard in Solid Surface. You save precious time because it is easier to work with.

Seamless perfection

HIMACS allows for visually seamless fabrication. Smooth integration creates large areas without visible joints or edges as well as the flush mounting of bowls. This results in extremely hygienic, easy-to-clean installations, ideally suited for use in hospitals and laboratories.

Three-dimensional design

HIMACS boasts a simple heating process and three dimensional thermoforming capabilities. This enables greater forming flexibility compared with other conventional materials so that spectacular ideas can quickly take on a concrete shape. HIMACS Ultra-Thermoforming formula allows the material to be better shaped; the minimal internal radius of 6 mm(previously 50 mm) opens a wholly new design dimension.

Dramatic translucency

Certain colours and thicknesses of HIMACS exhibit a subtle translucency when exposed to light. The translucent properties of HIMACS make it the perfect choice for lamps and illuminated furnishings.

Huge colour spectrum

Colour selection is a crucial factor when it comes to high-quality design. HIMACS offers an enormous range of colours. No matter what colour you choose, HIMACS remains 100% homogeneous.

Aurora Canyon

AURORA COLLECTION

The new Aurora Collection is inspired by the natural beauty of the Northern Lights. In brilliant waves over the sky the vibrant flow of Aurora Borealis is captured in these tones. With the semi-translucency of the colours Aurora Pavia and Aurora Cotton you can play with light effects giving dramatic results to integrate this natural phenomenon to your interior design.

• Representative Color

Aurora Blanc	Aurora Daymoon	Aurora Modern Grey
Aurora Linen Cream	Aurora Sable	Aurora Bisque
Aurora Umber	Aurora Terra	Aurora Sanremo

CONCRETE
COLLECTION

The industrial look of concrete combined with the incredible flexibility of HIMACS. The Concrete Collection adds huge opportunities for great designs to architects and designers.

• Representative Color

Urban Concrete

INTENSE ULTRA
COLLECTION

HIMACS Intense Ultra is based on a brand-new material formulation and combines Intense Colour technology with Ultra-thermoforming. Dark colours become more “intense”, darker and also more resistant, with less visible scratches. The new HIMACS Intense Ultra, also has excellent thermoforming capabilities. This new formula allows the material to reach a very small internal radius, up to 6mm, with almost no whitening effect even when using dark colours.

• Representative Color

Image:©Studio Podrini

MARMO

Captivating random veined texture, reminiscent of marble.

• Representative Color

VOLCANICS

The large particles of the Volcanics shades add a sense of style to any design. When used on a large scale the result is a dramatic showpiece.

ASTER

Aster is a collection of elegant shades of grey, ranging from almost white to a warm beige, all with a gorgeous mother of pearl shimmer.

• Representative Color

Andromeda

GRAVILLA

Gravilla means pebble in Spanish. It is a premium collection with short scattering feathers pattern on top of the granite chip. Its natural seam of short pattern and convenient visibility goes well with stylish and modern interiors.

Gravilla Snow

Gravilla Mist

GRANITE

Ultimate elegance thanks to lively textures, harmoniously natural tones and maximum subtleness. The Granite collection is perfect either alone or in combination with other colours.

• Representative Color

Rooibos

SOLID

The classic in terms of solid surfaces - a wide range of attractive shades of white lies at the heart of this collection. Complemented by colourful, dynamic uni-shade accents from Banana to Festival Pink. The timeless collection offers the perfect colour for every design.

Banana

LUCENT

Translucency and effective use of light are decisive design elements of contemporary architecture - the shades of the Lucent Collection, with their exceptional light translucency, allow for spectacular designs. Whether effectively backlit or simply illuminated, the Lucent colours of the architecture always add an elegant touch thanks to their characteristic effect with light.

PART. 1

PUBLIC BUILDINGS & OFFICES

Complete the various and sensual public lobby and information desk by applying HIMACS.

In addition, apply HIMACS to the office wall, stairway and washbasins for a unique interior point.

It is crucial and strict to choose interior materials for public buildings but HIMACS is ready to use as its proved superior quality through regular product test and certification acquisition.

The elegance of HIMACS in the new Panelwork showroom

“Panelwork” furniture manufacturing company’s showroom applied HIMACS at their various spaces such as columns, wall cladding, washbasins to express infinite design possibilities and creativity. The modern and ethereal aesthetics achieved with thermoformability of HIMACS, when translucent material combined with light, appear in different elements scattered throughout the showroom.

EB JOAQUIM
DE ALMEIDA
PRIMARY SCHOOL

05

Spectacular HIMACS façade : traditional school architecture meets high-tech material

“EB Joaquim de Almeida” primary school in the center of Montijos’ facade is not just an aesthetic element, but also a functional building. Its ventilated curtain wall facade gleams in triangular cut-outs as interesting geometrical design elements. The curtain wall made from the HIMACS solid surface material protects the glass facade behind it from inclement weather and provides effective shade from harsh sunlight.

PART. 05

HEALTHCARE

It is crucial and strict to choose the high hygiene standard material in a health-related space. HIMACS is hygienic, preventing the build-up of germs, bacteria and pathogens from accumulating in the first place. Its nonporous surface can be cleaned with ease. HIMACS will be the first choice in the healthcare sector with its world class certification through various tests.

PRODUCT SPECIFICATION

The perfect basis for your ideas : our comprehensive range of sheets.

Standard Formats

760 x 2490mm

910 x 2490mm

760 x 3000mm

1350 x 3000mm

760 x 3680mm

910 x 3680mm

1350 x 3680mm

1520 x 3680mm

Sheet Material

HIMACS is available in different thicknesses, formats and sizes. Perfect for maximum cutting and minimal costs. However, not all colours are available in every thickness. See the table for availability below. HIMACS sheet material is available in thicknesses of 6mm, 12mm and 20mm as well as the corresponding sheet formats.

Dimensions - Standard Format

SHEET THICKNESS (mm)	SHEET WIDTH (mm)	SHEET LENGTH (mm)
6	760	2490 *
	910	2490 **
	1350	3680 **
	1520	3680 **
12	760	3680 ***
	910	3680 ****
	1350	3680 ****
	1520	3680 ****
20	760	3000 *****

- * Only available in Solid, Granite, Lucent, Concrete (G554, G555, G556, G557)
- ** Only available in Solid, Granite, Concrete (G554, G555, G556, G557)
- *** Available in all colours including S928 & S728
- **** Only available in S928, Solid, Granite, Concrete (G554, G555, G556, G557)
- ***** Only available in Solid, Granite, Lucia, Volcanics, Concrete (G554, G555, G556, G557)

CERTIFICATIONS

Environmental Building Certificate – Grade “outstanding”

The Korean Air Cleaning Association certifies that HIMACS complies with the Korean regulations for environmental building materials.

ETA

Fixed with Keil inserts and a BWM structure, HIMACS facade in S728 - Alpine White successfully passed the ETA tests (European Technical Agreement).

Greenguard

HIMACS has been approved by Greenguard in the USA, as a “low emitting product”. The organisation establishes acceptable indoor air standards for indoor products, environments and buildings. The organisation's goal is to improve public health and quality of life through programs that improve indoor air.

IMO MED – Modules B and D

MED stands for Marine Equipment Directive. Both modules are extremely important for the shipbuilding industry, as they are mandatory for fabrication materials used in ships. IMO B covers the fire resistance of the material per se and certifies that the material has low flame spread characteristics and is not capable of producing excessive quantities of smoke and toxic combustion products. Module D covers the overall production capacity and checks, among other production processes, the management and systems used.

NSF

NSF standards are generally accepted norms for a variety of public health related industries and fields. These include drinking water treatment and contact with materials, food equipment manufacturing etc. NSF recognises that HIMACS complies with NSF norms.

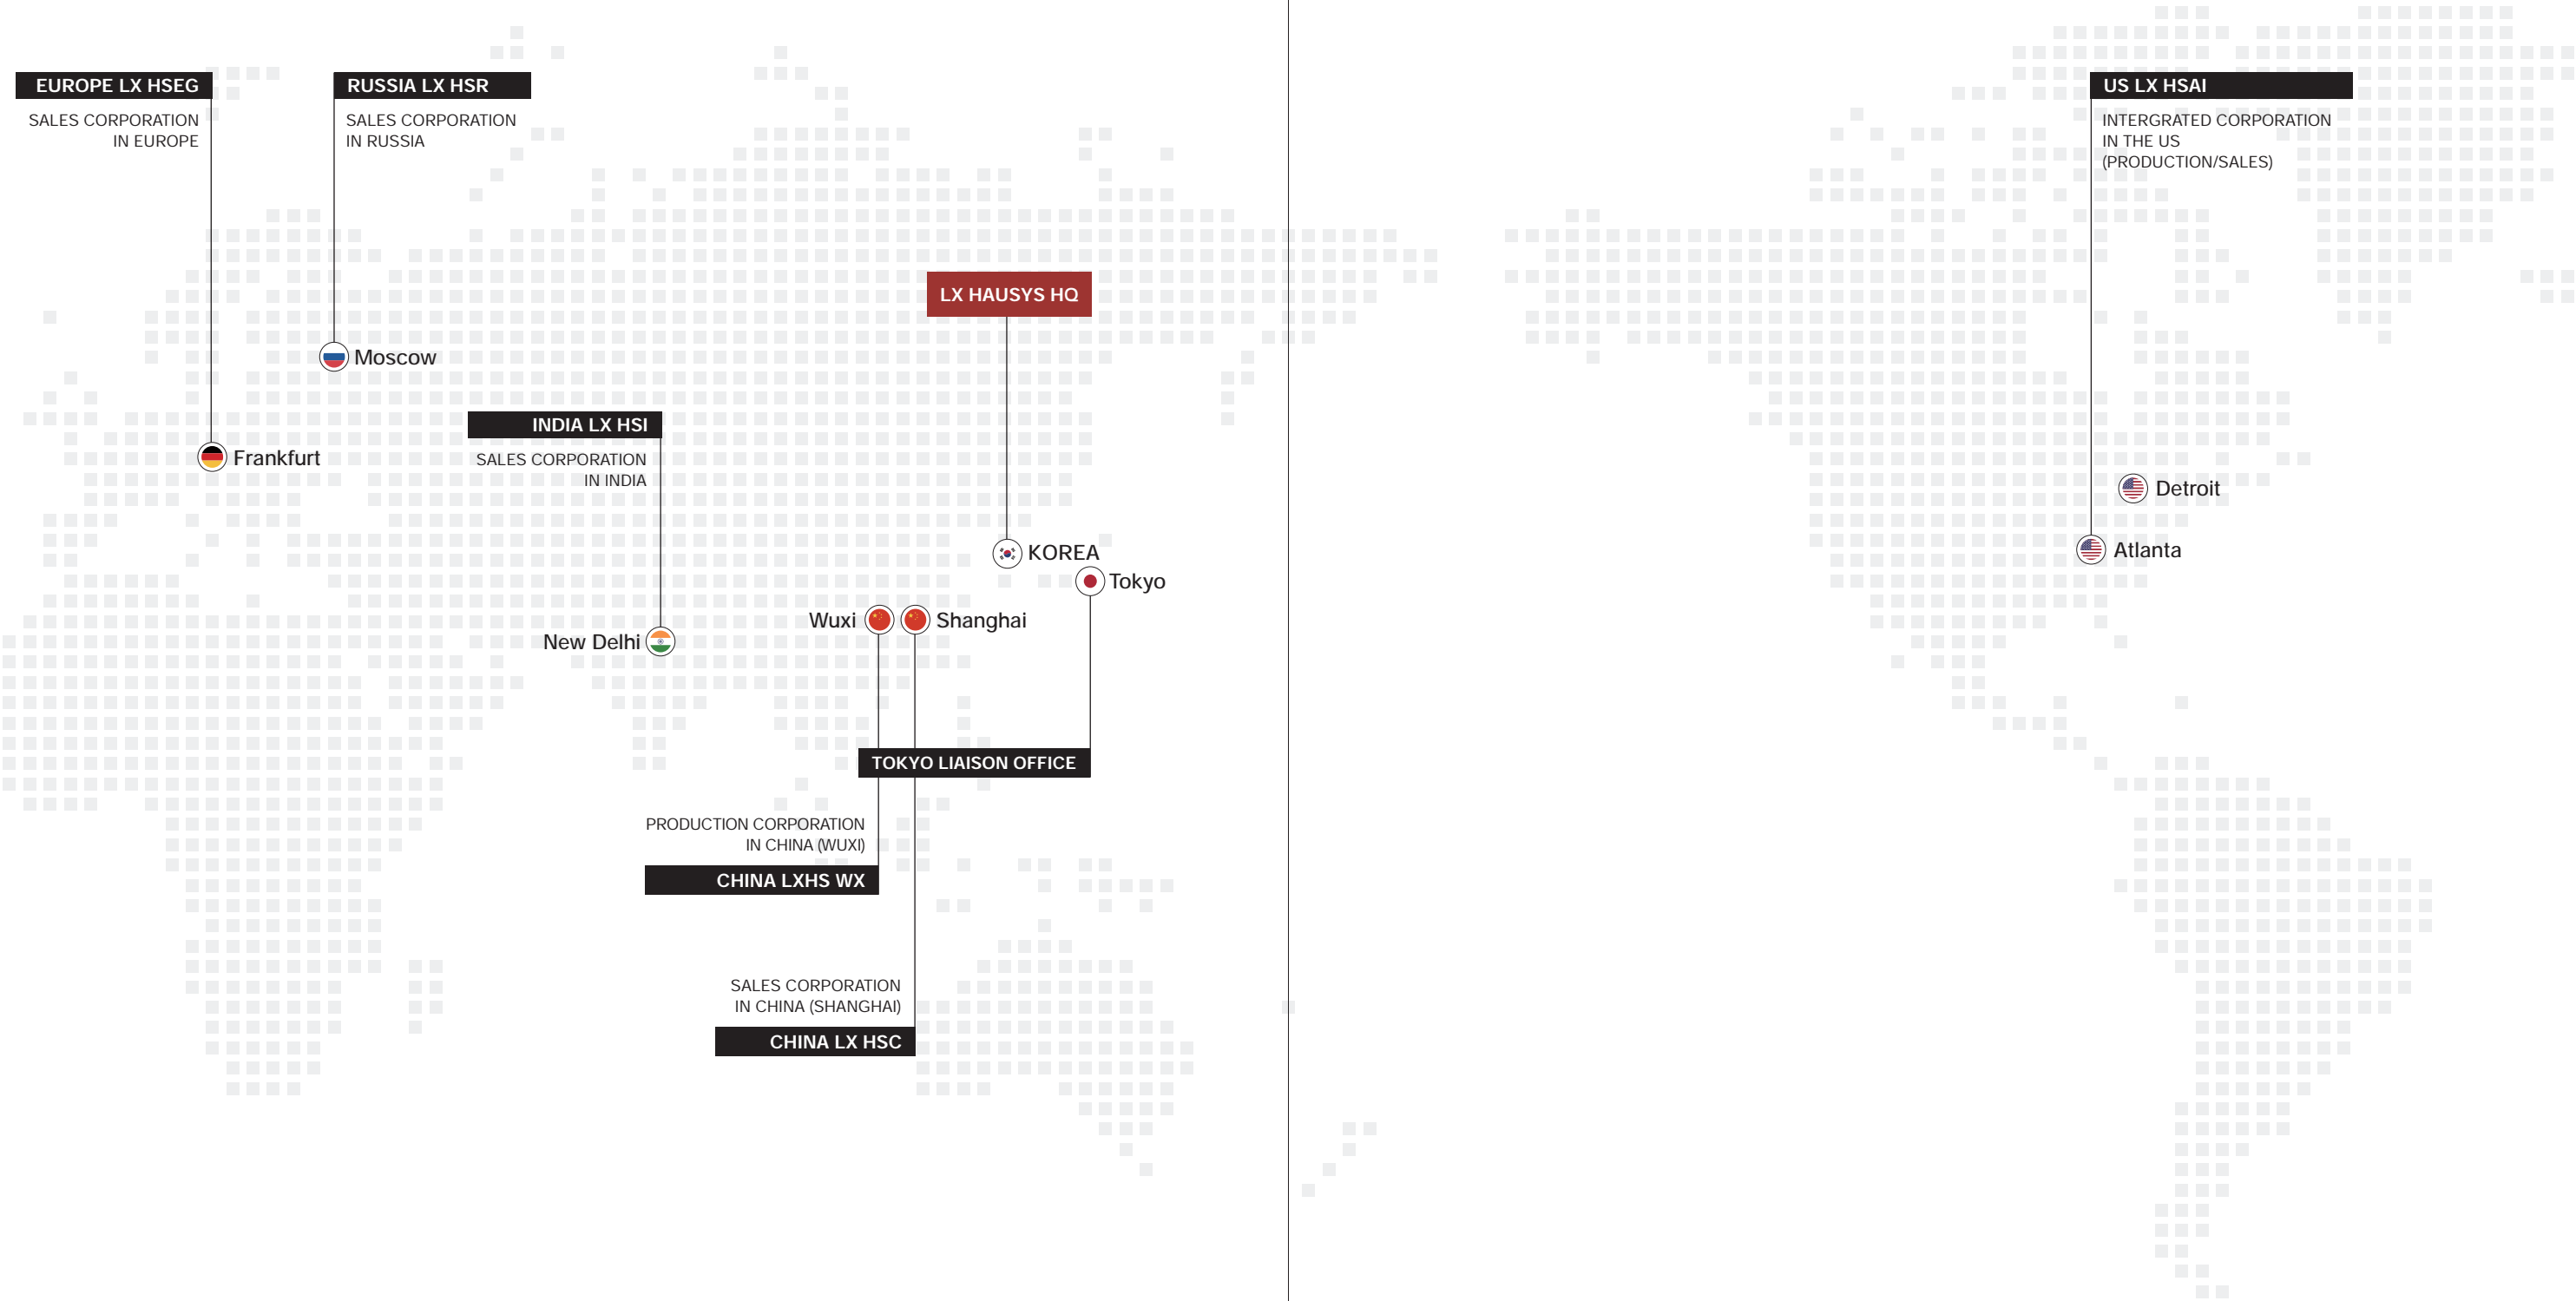

SCS

This is a certification related to the use of recycled raw materials. A total of six products, including 3 types of Granites and 3 types of Volcanics, have been certified as SCS recycled raw materials using more than 10% recycled artificial marble raw materials during production from SCS Global Service in the U.S.
